

SURFACE AREA AND PORE SIZE ANALYSER – CAD-Instrument -France

- Fully Automatic and fast Multipoint BET analyser
- Solution for all type of Powder and Solid sample Surface area and Pore size analysis .
- Four samples can be analysed simultaneously and independently .
- Separate Degasser System
- BET surface area analysis can be completed in 30 minutes for 4 samples.
- Surface area limit: <math>< 0.01\text{m}^2/\text{g}</math> (by N_2)
- Pore size range: 0.35-500 nm
- Analysis ports: 4
- Data processing: High Precision 24-bit analog-to-digital conversion system with data storage function in case of accidental power off.
- Data reproduction : - BET /Langmuir/Isotherm/BJH/STSA/Total Pore Volume/t-plot/MP/DR
